The reproduction and utilization of this document as well as the communication of its contents to others without express authorization is prohibited. Offenders will be held liable for the payment of damages. All rights reserved, especially in the event of the grant of a patent, utility model or design.

1 Scope of application

This standard defines the requirements with regard to prohibited, declarable and restricted substances along the entire supply chain and for all purchased products (chemicals, mixtures, products, packaging, packaging materials and raw materials) which are delivered to Schaeffler and all its companies and brands worldwide. Laboratory chemicals and other products not directly related with saleable Schaeffler products or with their transport, storage, production or development (e.g. building cleaners, office supplies) are excluded from this standard. Compliance with this standard does not release the supplier from the responsibilities given in further applicable legislation and specifications.

2 Vocabulary and abbreviations

Purchased product: All purchased products within the scope of application of this standard; such as chemicals, mixtures, products, packaging, packaging materials, traded goods and raw materials.

Substance: Chemical element and its compounds; ingredient, substance

PFAS: PFAS (per- and polyfluoroalkyl substances) are aliphatic organic substances in which the hydrogen atoms on the carbon chain have been completely replaced by fluorine atoms on at least one carbon atom.

BAFF: Application/release form for indirect substances.

Substances with an expiration date: The legal basis listed in Annex A "List of legal and regulatory requirements", but not exclusively applicable, may contain in annexes or also in the main text lists of chemical substances that are restricted to be used after a defined date (e. g. substances with sunset date, expiring substances).

SCIP database: SCIP is the database for information on Substances of Concern in articles as such or in complex objects (Products) established under the Waste Framework Directive (WFD).

Mixture: Chemical product composed of two or more substances (e.g. lubricants, anti-corrosion agents, electroplating chemicals, cleaners).

Product (definition as per REACH Regulation (EC) No. 1907/2006, article 3): Object which is given a specific form, surface or shape by manufacturing which determines its function to a greater extent than its chemical composition.

Packaging and packaging materials: A material intended for wrapping products for the purpose of protecting the products, protecting the environment, of transport and/or storage (e.g. canisters, cardboard, cases, bottles, containers, pallets, blister, plastic bags and film).

Homogeneous material (according to RoHS directive on restrictions of the use of certain hazardous substances in electrical and electronic equipment or GADSL, guidance document 'Global Automotive Declarable Substance List): Material that cannot be separated mechanically into individual components. Mechanical separation means physical separation by means of cutting, turning on a lathe, grinding, rubbing off; examples include polymer, metal, metal alloy, coating, lubricant, soldering agent.

3 Prohibited and declarable substances

Prohibited substances (chemical elements and their compounds) in terms of this standard are marked in the associated List of Substances (Appendix A of this standard) with a "P" (*Prohibited*). They must not be contained in purchased products delivered to Schaeffler in concentrations above the threshold-specified, nor be formed or released in such concentrations by subsequent processing. Exceptional approval of prohibited substances can be agreed on a case-to-case basis, provided that no practicable alternative is available (e.g. methanol used for hardening).

Exceptions must be agreed in writing. No special format is provided for this. For example, the documentation of an email or in the BAFF application is enough.

Prohibited substances are subject to a threshold of 0,1 % (w/w) in homogeneous material unless a different value is specified.

Prohibited substances in concentrations below 0,1 % or the specified threshold must be declared.

Very small quantities of prohibited or declarable substances that are present as impurities and are not intentionally added do not have to be declared (<< 0.1 % or << threshold).

Substances marked in the List of substances of this standard with a "D" (*Declarable*) must be declared according to the specifications of this standard if their concentration is above the limit value. The threshold of declarable substances is 0,1 % (w/w) in homogeneous material unless a different value is specified.

Prohibited and declarable substances are listed in the List of substances provided in Appendix A of this standard. The declaration format to be used in each individual case, and the procedure for handling the associated declaration of conformity, is described in the following sections.

All PFAS substances must be declared (see Appendix A, list of substances, item 2).

All substances which are declared in a MSDS (Material Safety Data Sheet), must also be declared in the Schaeffler Format of the conformity declaration.

Application-specific prohibition and declaration constraints (e.g. for medical products and hygiene products) shall be considered as early as the product development phase. Where a special application has been agreed for a product or a mixture, suitable materials and components shall be chosen as early as the product development phase. Planned modifications of products and components, and of their materials and formulations, must be agreed at an early stage with the corresponding Schaeffler contact (e.g. local purchasing, substance group coordinator, application engineering or product development).

This does not replace the change authorization for changes.

Note that for packaging and packaging material of all sorts, declarable (D) and prohibited (P) substances must be documented in Schaeffler format.

In general, no prohibited substances may be used for packaging materials and packaging.

Substances that must be declared must also be avoided.

Exceptions must be documented in writing.

Packaging of supplied purchased products (chemicals, mixtures, products, packaging, packaging materials and raw materials) must be able to be disposed of in the country of delivery without violating existing laws or returned to the supplier after consultation.

4 Supplier information sheet for Standard S132030-1

Supplier information

The Excel template "Supplier information sheet" is provided in the first sheet of Appendix A to this standard. The supplier information can be transmitted either for individual purchased Schaeffler products or, if declaration requirements are identical (e.g. in the case of identical or comparable materials regarding the composition), for multiple products, series, product families or for the complete Schaeffler delivery scope.

The proof of supplier consists of sections basic information, declaration of conformity, list of legal and official requirements, list of purchased parts and declaration in Schaeffler format.

General queries can be addressed to the respective local purchasing department and technical queries regarding the S132030-1 standard to Material Compliance: MaterialCompliance@schaeffler.com

The supplier must inform Schaeffler (responsible Purchasing and Material Compliance:

MaterialCompliance@schaeffler.com) if his delivered purchased products (chemicals, mixtures, articles, packaging, packaging materials and raw materials)

- a) contain prohibited and/or declarable substances.
- b) contain prohibited substances below the threshold (declarable!).
- c) contain SVHC substances (substance of very high concern).
- d) contain substances with an expiration date.

The information must be communicated to Schaeffler immediately or at the latest 2 months after publication of new substances (with the properties a) - d)) in the form of a conformity declaration (Annex A) and, if applicable, an IMDS entry.

List of purchased products

If the supplier information is intended to apply for multiple products with identical declaration requirements, the relevant products must be listed, in addition to this template, in the sheet "List of purchased products" contained in the same Excel document. If the information is expected to apply for the complete delivery scope, it is sufficient to enter a note that the supplier information applies for all products delivered by the company concerned to Schaeffler as a whole or to a specific Schaeffler unit.

To simplify the completion and evaluation of the supplier information (list of legal and official requirements and, where relevant, the list of purchased products), sheets should be completed directly in the electronic Excel template. Because of the large number of its suppliers, Schaeffler must rely on an automatic evaluation therefore the filled in, signed and scanned supplier's conformity declaration must always be returned to Schaeffler as a pdf document together with the completed list of legal and official requirements. In addition, the completed Excel document should also be returned.

Supplier information can only be accepted if at least the "Basic information" and "Declaration of conformity" zones in the Excel template are completed fully and correctly, and if the document is duly signed.

a.) Basic information

The basic information zone of the supplier information shall be entered with information about the supplier and a **purchased** product. If the supplier information is intended to apply to more than one **purchased** product, a note referring to the completed list of purchased products is sufficient or the reference to the entire scope of delivery.

b.) Declaration of Conformity

In the Declaration of Conformity, at first, the category of the purchased Schaeffler product must be selected. **If applicable the category must be agreed with the Schaeffler contact (e.g. local purchasing, substance group coordinator, application engineering or product development.**

All lines relevant for the product (depending on usage at Schaeffler) must be filled or the answers must be selected from the pre-defined drop-down list.

c.) List of purchased products

If the supplier information is intended to apply to multiple products due to identical declaration requirements, the relevant products must be listed in addition to this template in the "List of purchased products" sheet contained in the same Excel document. If the information is expected to apply to the complete delivery scope, it is sufficient to enter a note that the supplier information applies to all products delivered by the respective company to Schaeffler or to a specific Schaeffler unit.

d.) List of legal and official requirements

For purchased products, Schaeffler also requires current information about compliance with other legal and official requirements to ensure that Schaeffler products can be sold in certain countries and regions. In this context, the "List of legal and official requirements" tab sheet can be found in Appendix A. This list should be filled completely to the best of our knowledge (**knowledge of the supplier**). For local applications it must be ensured that at least the relevant local laws are observed. The more legal requirements are met, the greater the range of applications at Schaeffler. In the best case, the product can be used worldwide. It is possible that for various reasons not all requirements apply to the purchased product (countries, regions, application, market) or that the supplier is not aware of individual legal requirements, then either select "no" in the "Applicable" column or tick the "Not known" box. All fields in the "Applicable" column must be filled with yes or no!

e.) Declaration in Schaeffler format

This table serves for the declaration of substances contained in materials, see also section 5, declaration of substances.

5 Declaration of substances

Declarable or prohibited substances contained in the relevant purchased products must be declared. The minimum information to be entered is the name of the substance, its CAS number and the concentration in the homogeneous material (unless otherwise required). Regardless of the declaration format, declarations shall be submitted at the time stated in Schaeffler standard S 296001-2 "Quality Assurance Agreement with Production Material Suppliers".

The REACH Regulation (EC) No. 1907/2006 includes a duty to provide information about substances of very high concern which are listed in the so-called SVHC candidate list. Schaeffler suppliers are obliged to inform immediately by means of an updated supplier information and, if necessary, an updated IMDS entry as soon as they have more current information than that already reported to Schaeffler about substances of the SVHC candidate list which are contained in concentrations above 0,1% (w/w) in materials supplied by them. If no information about substances in the supplied materials is submitted within 45 days after an update of the SVHC candidate list, it will be assumed that none of the relevant substances are contained in a concentration of more than 0,1% (w/w).

When the obligation to declare SVHCs in the SCIP database under the Waste Framework Directive (Directive 2008/98/EC) comes into force, this information must be provided in an appropriate manner.

IMDS – International Material Data System of the automotive industry

An entry in the IMDS - the International Material Data System (link: www.mdssystem.com) - is mandatory for the declaration of substances contained in products and their materials purchased by Schaeffler for use in the automotive industry, as well as for polymer products. The IMDS ID number stated in the supplier information for the product concerned must be entered under basic information. If the supplier information is intended to apply for more than one product, a note referring to the associated list of purchased products is sufficient. In this case, the IMDS ID numbers are entered in the appropriate column of that list.

The IMDS data must be compliant with the IMDS rules applicable at the moment of its creation. Moreover, the Schaeffler requirements for IMDS entries stated in Appendix B of this standard, the "IMDS Guideline", must be respected.

A declaration in the form of a data sheet in the IMDS does not constitute an exceptional approval of otherwise prohibited substances. **If a substance is to be declared in the IMDS that is not yet selectable in the IMDS menu, the addition of this substance can be requested using the "Basic Substance Request" function in the IMDS main menu.**

Declaration in the Schaeffler format

The declaration in the Schaeffler format must be completed where declarable or prohibited substances must be declared in purchased Schaeffler products and this is not done in the IMDS (International Material Data System; link see below).

Other Formats

On request, a declaration in other formats such as CAMDS (= Chinese Automotive Material Data System) may also be required.

Table 1 – Declaration format for different products / applications

Category A: Schaeffler products = Purchased products that remain in or on saleable Schaeffler products.
Category B: Production Chemicals = Purchased products that are used in manufacturing processes & Maintenance but do **not** remain in saleable Schaeffler products.
Category C: Packaging material = All packaging materials and packaging for Schaeffler customers.

If necessary, the applicable category must be agreed with the Schaeffler contact in charge (e. g. local purchasing, substance group coordinator, application engineering or product development)!

Category	Examples	Product / Application at Schaeffler	Declaration format
A	<u>Raw materials:</u> e. g. strips, sheets, tubes, bars, wires, plastic granules	For the automotive industry	IMDS or CAMDS declaration (on request)
	<u>Chemicals/mixtures which remain on the component:</u> e. g. lubricants, anti-corrosion agents		
	<u>Products:</u> e. g. components, coated components, seals, cages, rolling elements, rolling bearings, plain bearings, friction material	For other applications than the automotive industry	Schaeffler format
B	<u>Products:</u> e. g. tools, machine components <u>Chemicals/mixtures:</u> e. g. lubricants, electroplating chemicals, anti-corrosion agents	All products of this category	Schaeffler format
C	<u>Packaging and packaging material:</u> e. g. cardboard, drying agents, pallets, wooden cases, plastic packagings (blister, film, bags)	All products of this category	Schaeffler format

Customer- or industry-specific format

If Schaeffler must forward such information to a customer in a format different from those stated above, the supplier shall - in special cases and subject to agreement - provide such declarations in the customer- or industry-specific format required.

Appendix A (normative)

Supplier information: Must be completed directly in Excel format. - Link: [Sustainability | Schaeffler Germany](#)

Appendix B (normative)

IMDS Guideline - Link: [Sustainability | Schaeffler Germany](#)

Choosing the corresponding category for the conformity declaration:

- 1. Category A** must be chosen for purchased products, **which remain in or on Schaeffler sales products.**
- 2. Category B** must be chosen for purchased products, **which are used in manufacturing processes and maintenance, but do not remain in Schaeffler sales products.**
Item 7 (Chemicals and mixtures) does not need to be filled in for purchased parts that do not remain in or on Schaeffler sales products.
- 3. Category C** must be chosen for purchased products, **that serve as packaging material for Schaeffler sales products and are delivered to customers.**

If necessary, the corresponding category must be clarified with the Schaeffler contact (e.g. local purchasing, substance manager or application technology).

Conformity declaration						→ Step 2:
Category A:						If necessary, the corresponding category must be clarified with the Schaeffler contact (e.g. local purchasing, substance manager or application technology).
Material Compliance Information for purchased Schaeffler products which remain in or on saleable Schaeffler products.						
No.	Requirements apply to:	Material Compliance (MC) Requirements	Is the requirement valid for the purchased product? yes/no	Is the purchased product compliant? yes/no	Declaration: IMDS, Schaeffler-Format or no declarable substances	→ Step 3:
1	All purchased products worldwide	Schaeffler generally prohibited substances, - CLP Directive (EC) No. 1272/2008 - EU Regulation (EC) No. 1005/2009 on substances depleting the ozone layer, Clean Air Act Classes I & II	yes			Answer to the compliance questions considering the requirements applicable
2		Schaeffler restricted substances, - CLP Directive (EC) No. 1272/2008 - United States H.R. 4173 - "Conflict Minerals" respective "Dodd-Frank-Act": Section 1502 of H.R. 4173	yes			Use dropdown function for filling.
3		3.1 REACH Regulation (EC) No. 1907/2006	yes			The Material Compliance (MC) Requirements apply to: No. 1-3 All purchased products worldwide: that means these requirements must be confirmed in principle for all products supplied. No. 4 and 5 for Automotive industry: that means these requirements must be confirmed in addition (to No. 1-3) for all supplied products used in the automotive industry. No. 5 and 6 for Non-Automotive industry (Industry): that means these requirements must be confirmed in addition (to no. 1-3) for all supplied products used in the Non-Automotive industry (industry). No. 7 for chemicals and mixtures: that means these requirements must be confirmed in addition (to no. 1-3) for all chemicals and mixtures supplied. No. 9 purchased products that means these requirements
		3.2 POP Regulation (EU) No. 2019/1021 on persistent organic pollutants	yes			
		3.3 Toxic Substances Control Act of 1976 (TSCA) All chemicals, mixtures, materials and articles supplied to and by Schaeffler must satisfy applicable chemical laws, rules, regulations and recommendations valid in the country of usage (e.g. REACH, CLP, TSCA). Therefore Schaeffler requests for your full cooperation in Schaeffler's efforts to legally comply with (applicable) Global Chemical regulations related but not limited to chemicals Registration, Notification, Restriction, Prohibition, Hazard Classification, Labeling, Packaging.	yes			
	Select and confirm applicable laws See Appendix A "List of legal requirements". - Complete the list to the best of your knowledge. - If laws do not apply, enter no in column "D". - If laws are not known, enter X in column "F".	yes				
4	All purchased products for Automotive industry	ELV Directive 2000/53/EG on End-of-Life Vehicles				
5	All purchased products for Automotive and Non-Automotive industry	Requirements of GADSL (Global Automotive Declarable Substance List), GADSL should also be confirmed for all purchased parts for Non-Automotive industry.				

6	All purchased products for Non-Automotive industry	RoHS Directive 2011/65/EU				must be confirmed in addition (to no. 1-3, 5 and 6) for all purchased products which are used in the Railway sector.
7	All chemicals and mixtures	Further specifications for chemicals and mixtures - for use in manufacturing, maintenance and in Schaeffler products - does not apply to semi-finished products & products in general				No. 10 purchased products for Aerospace: that means these requirements must be confirmed in addition (to no. 1-3, 5 and 6) for all purchased products which are used in the aerospace sector
9	All purchased products for Railway	Rail Industry Substance List (RISL) by UNIFE (Union of European Railway Industry)				
10	All purchased products for Aerospace	Aerospace and Defense Declarable Substances List (AD-DSL) , which is created and maintained by International Aerospace Environment Group (IAEG)				
Declaration in Schaeffler Format - alternative to IMDS						
Declarable substances			CAS number	Substance concentration	Unit acc. to list of sub-stances	Remarks*1
- according to actual list of substances (S 132030-1)			other Identification number, only when CAS number isn't existing			
Example:	<i>Lead</i>	<i>7439-92-1</i>	<i>e. g. 2,0</i>	<i>% (w/w)</i>	<i>e. g. brass cage</i>	Declare any substance presence considering the applicable requirements
						This is applicable if no alternative such as IMDS exists.
*1 = example for prohibited substances: Reason; affected material is present in the product; RoHS or ELV exception; for chemicals and mixtures; analytical method

Fill in here: "table"			Supplier/Company:		If the supplier doesn't have a Schaeffler-Supplier-number please fill in "none".
			Schaeffler-Supplier-number:		
Supplier	Name of the product		Supplier Contact person Name: email: Phone-No.:		For more details, such as product designation or material number, address to your contact person at Schaeffler (e.g. local purchasing, substance group coordinator or application technology).
	Material number				
	IMDS-ID-No. (if existing)		Supplier: Conformity declaration drawn by Name: Date:		
Schaeffler	Name of the product		Supplier signature: (Stamp where applicable) (Electronic signature where applicable)		
	Material number (13 digits)				
Schaeffler Status (assessed by Material Compliance)	Date:		Schaeffler: Signature (Electronic signature where applicable)		
	Name:				
	Status: (in assessment/ released/ not released)				

Conformity declaration						→ Step 2:
Category C: Material Compliance Information for purchased Schaeffler products which are used for packaging for covering, transporting, storing and/or preserving of Schaeffler products.						If necessary, the corresponding category must be clarified with the Schaeffler contact (e.g. local purchasing, substance manager or application technology).
No.	Requirements apply to:	Material Compliance (MC) Requirements	Is the requirement valid for the purchased product? yes/no	Is the purchased product compliant? yes/no	Declaration: IMDS, Schaeffler-Format or no declarable substances	
1	All purchased products worldwide	Schaeffler generally prohibited substances, - CLP Directive (EC) No. 1272/2008 - EU Regulation (EC) No. 1005/2009 on substances depleting the ozone layer, Clean Air Act Classes I & II	yes			→ Step 3: Answer to the compliance questions considering the requirements applicable
2		Schaeffler restricted substances, - CLP Directive (EC) No. 1272/2008 - United States H.R. 4173 - "Conflict Minerals" bzw. "Dodd-Frank-Act": Section 1502 of H.R. 4173	yes			Use dropdown function for filling.
3		3.1 REACh Regulation (EC) No. 1907/2006	yes			The Material Compliance (MC) Requirements apply to: No. 1-3 All purchased products worldwide: that means these requirements must be confirmed in principle for all products supplied. No. 8 for packaging materials: that means these requirements must be confirmed in addition (to No. 1-3) for all supplied packaging materials delivered to Schaeffler customers.
		3.2 POP Regulation (EU) No. 2019/1021 on persistent organic pollutants	yes			
		3.3 Toxic Substances Control Act of 1976 (TSCA) <i>All chemicals, mixtures, materials and articles supplied to and by Schaeffler must satisfy applicable chemical laws, rules, regulations and recommendations valid in the country of usage (e.g. REACh, CLP, TSCA). Therefore Schaeffler requests for your full cooperation in Schaeffler's efforts to legally comply with (applicable) Global Chemical regulations related but not limited to chemicals Registration, Notification, Restriction, Prohibition, Hazard Classification, Labeling, Packaging.</i>	yes			
		Select and confirm applicable laws <i>See Appendix A "List of legal requirements". - Complete the list to the best of your knowledge. - If laws do not apply, enter no in column "D". - If laws are not known, enter X in column "F".</i>	yes			

8	All packaging materials, for Schaeffler customers	Further specifications for packaging materials supplied to Schaeffler customers <i>e.g. Packaging and Packaging Waste Directive 94/62/EC</i>	yes			
Declaration in Schaeffler Format - alternative to IMDS						
Declarable substances		CAS number	Substance concentration	Unit acc. to list of sub-stances	Remarks*1	→ Step 4:
- according to actual list of substances (S 132030-1)		other Identification number, only when CAS number isn't existing				
Example:	<i>Lead</i>	<i>7439-92-1</i>	<i>e. g. 2,0</i>	<i>% (w/w)</i>	<i>e. g. brass cage</i>	Declare any substance presence considering the applicable requirements
						This is applicable if no alternative such as IMDS exists.
*1 = example for prohibited substances: Reason; affected material is present in the product; RoHS or ELV exception; for chemicals and mixtures; analytical method						

Appendix A – Substance List

P = Prohibited

D = Declarable

Seq. no.	Relevant substances	CAS number	Classification	Limit value	Remarks / legal background	Application example
1	Schaeffler generally prohibited substances - applies to all products, chemicals, mixtures and also to packaging material -					
	Substances of the following hazard classes: - Carcinogenicity, Carc. 1A, Carc. 1B (H350 et seq.) - Germ cell mutagenicity, Mutag. 1A, Mutag. 1B (H241) - Reprod. toxicity, Repr. 1A, Repr. 1B (H360 et seq.)	-	P	0,1 % or threshold **)	CLP Regulation (EC) No. 1272/2008	Valid for Chemicals and mixtures, not valid for products
	Substances with acute toxicity, Acute Tox. 1, 2, 3 (was: highly toxic or toxic substances)	-	P	0,1 % or threshold **)	CLP Regulation (EC) No. 1272/2008	Valid for Chemicals and mixtures, not valid for products
	Flammable substances with H-statements H220, H222, H224 (was: highly combustible substances)	-	P	0,1 % or threshold **)	CLP Regulation (EC) No. 1272/2008	Valid for Chemicals and mixtures, not valid for products
	Explosive substances with H-statements H200, H201, H202, H203, H204, H240, H241 (was: explosive substances)	-	P	0,1 % or threshold **)	CLP Regulation (EC) No. 1272/2008	Valid for Chemicals and mixtures, not valid for products
	EU Regulation (EC) No. 1005/2009 on substances depleting the ozone layer, Clean Air Act Classes I & II	-	P	0,1 % or threshold **)	CLP Directive (EU) No. 1272/2008	Substances hazardous to the ozone layer, all substances
	Radioactive substances, all compounds Including impurities in metals		P	0,1 % or threshold **)	Radiological Protection Ordinance (StrSchV) Atomic Energy Act	e.g. impurities in steel
2	Schaeffler Restrictions – applies to all products, chemicals, mixtures and also to packaging material -					
	Substances of the following hazard classes: - Carcinogenicity, Carc. 2 (H351) - Germ cell mutagenicity, Mutag. 2 (H241) - Reprod. toxicity, Repr. 2 (H361 et seq.)	-	D	0,1 % or threshold **)	CLP Regulation (EC) No. 1272/2008	Valid for Chemicals and mixtures, not valid for products
	Substances causing respiratory (e.g. Asp. Tox. 1)/skin sensitization	-	D	0,1 % or threshold **)	CLP Regulation (EC) No. 1272/2008	Valid for Chemicals and mixtures (e.g. metal alloys (nickel), paints, glues), not valid for products
	United States H.R. 4173 - "Conflict Minerals" respectively. "Dodd-Frank-Act": Section 1502 of H.R. 4173	-	D	0,1 % or threshold **)	Conflict Minerals	tantalum, tin, tungsten, gold, cobalt and derivatives from the Democratic Republic of the Congo and adjacent; e.g. in steel
	Alkyl phenols and alkyl phenol ethoxylates	-	D	0,1 % or threshold **)	-	e. g. plastics, cleaner
	Nitrosamines or substances forming nitrosamines by reaction	-	D	0,1 % or threshold **)	-	e. g. anti-corrosion agents, cooling lubricants (secondary amines)
	Organically bound silicon	-	D	10 ppm	Polydimethylsiloxane should not be used	e.g. anti-corrosion agents, lubricants, coolants, cleaner
	Biocides	-	D	0,1 % or threshold **)	ChemVerbotsV, Regulation (EU) No. 528/2012 and for metalworking fluids the VKIS-VSI-IGM-BGHM substance list has to be applied	e.g. anti-corrosion agents, coolants, cleaner, paints, varnishes, wooden packaging

Seq. no.	Relevant substances	CAS number	Classification	Limit value	Remarks / legal background	Application example
	Polyvinylchloride (PVC)	9002-86-2	D	0,1 % or threshold **)	-	e.g. cable insulations, packaging material
	Phthalates		D	0,1 % or threshold **)	-	e.g. plasticizers in plastics
	Organic tin compounds		D	0,1 % or threshold **)	-	e.g. plastics, resins, paints, varnishes, dyes
	all PFAS (per- and polyfluoroalkyl substances)		D	> impurity *)		e.g. plastics, membranes, coatings, sealant, greases and oils
	DOTG (N,N-Di-o-tolylguanidine)	97-39-2	D	> impurity *)	customer specific requirements	e.g. vulcanisation accelerator
3.1	REACH Regulation (EC) No. 1907/2006, SVHC-Candidate List, Appendix XIV and Appendix XVII - applies to all products, chemicals, mixtures and also to packaging material -					
3.2	POP Regulation (EC) No. 2019/1021 on persistent organic pollutants					
3.3	Toxic Substances Control Act of 1976 (TSCA)					
4	ELV Directive 2000/53/EG on End-of-Life Vehicles - applies only to purchased products to be used in saleable Schaeffler products in the automotive sector - <i>In the most current version valid at the time of issuing the declaration</i>					
5	GADSL - Global Automotive Declarable Substance List <i>- applies to all purchased products to be used in saleable Schaeffler products, even for products not intended for use in the automotive sector -</i> <i>In the most current version valid at the time of issuing the declaration</i>					
6	RoHS Directive 2011/65/EU (was 2002/95/EC) on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment <i>- applies only to purchased products to be used in saleable Schaeffler products but not in the automotive sector -</i> <i>In the most current version valid at the time of issuing the declaration</i>					
7	Further specifications for chemicals and mixtures for use in manufacturing, maintenance and in Schaeffler products <i>- does not apply to semi-finished products & products in general -</i>					
	VKIS-VSI-IGM-BGMH List of materials <i>- Analogously applicable for all chemicals and mixtures</i>	-	-	0,1 % or threshold **)	VKIS-VSI-IGM-BGMH List of materials	e.g. anti-corrosion agents, lubricants, coolants, cooling water additives, cleaner, electroplating chemicals
	Copper and its compounds	-	P	10 ppm	Prohibition only for metalworking fluids	in addition, the VKIS-VSI-IGM-BGMH substance list applies.
	Benzotriazole	95-14-7	D	0,1 % or threshold **)	allergenic potential	e.g. cooling lubricants, anti-corrosion agents
	Metals and metal compounds (Cu, As, Pb, Hg, Cd, Cr(VI), Ni, Sn, Be, Co, Ti, Sb, Mo, Zn)	-	D	each 10 ppm	-	-
	Polyalkylen glycols	-	D	0,1 % or threshold **)	-	-
	Chloride	-	D	20 ppm	-	-

Seq. no.	Relevant substances	CAS number	Classification	Limit value	Remarks / legal background	Application example
8	Further specifications for packaging, e. g. Packaging and Packaging Waste Directive 94/62/EC <i>- applies to all packaging material used in production and for saleable Schaeffler products, except for packaging returned to the supplier -</i>					
	Lead, cadmium, mercury, chromium (VI) in packaging		P	sum of all 4 elements max. 100 ppm	Packaging and Packaging Waste Directive 94/62/EC	e.g. plastic packaging, painted and varnished packaging
9	Rail Industry Substance List (RISL) , which is issued and managed by Union of European Railway Industry (UNIFE) . https://www.unife.org/activities/environment-and-sustainability/rail-industry-substance-list/					
10	Aerospace and Defense Declarable Substances List (AD-DSL) , which is created and maintained by International Aerospace Environment Group (IAEG) https://www.iaeg.com/chemicalrpt/addsl/					

*) > impurity means here that the substance must be declared if it is more than an impurity (<< 0,1 % or << threshold) or if it has been added intentionally.

Above threshold values for declarable substances, the substance must be declared.

**) 0,1 % or threshold means here, limit value 0,1 % w/w in homogenous material, unless otherwise specified.

Where the legal ordinance states stipulates a more stringent value, that applies!

Appendix A – List of legal requirements

Fill in the list completely to the best of your knowledge.

Column 4: Is the law applicable to the product: yes/no

Column 5: Does the product comply with this law: yes/no

Column 6: The law is not known: X

Column 7: Comment/Remark

Issue	List of legal requirements (applicable to the listed regulations are their sub laws and amending regulations, valid at the date of confirmation; confirmations are valid for lead regulation (mother law) their sub laws and amendments)	Country	Applicable (see dropdown menu)	Compliant (see dropdown menu)	I don't know	Comment
ROHS	Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment (recast) - [EU ROHS]	EU				
	Act for Resource Recycling of Electrical and Electronic Equipment and Vehicles; Act No. 6319 - Resource Recycling - [Korean ROHS]	KR				
ELV	Act for Resource Recycling of Electrical and Electronic Equipment and Vehicles Act No. 8405 of 2007-04-27 (Korean RoHS/ELV)	KR				
	DIRECTIVE 2000/53/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 18 September 2000 on end-of life vehicles	EU

	Clean Air Act (US)	US				
Packaging	European Parliament and Council Directive 94/62/EC of 20 December 1994 on packaging and packaging waste	EU				
	Model Toxics in Packaging Legislation (TPCH)	US				
	California State Health and Safety Code 25214.11	US				
Recycling	Act on the Promotion of Saving and Recycling of Resources; Act No. 6653; 04.02.2002.	KR				
Ships	Regulation (EU) No 1257/2013 of the European Parliament and of the Council of 20 November 2013 on ship recycling	EU				
	REGULATION (EC) No 782/2003 on the prohibition of organotin compounds on ships	EU				

Appendix B - IMDS (International Material Data System of the automotive industry) Guideline for Suppliers

1. Purpose:

This document is a guideline to ensure the data quality in the IMDS and describes the requirements for IMDS material data sheets (hereinafter called MDS) submitted to Schaeffler by suppliers of the Schaeffler Group. For any questions related IMDS reporting please feel free to contact our specialists at IMDS@schaeffler.com.

2. Scope of application:

All Schaeffler suppliers required to submit IMDS data according to the specifications of S132030-1, must comply with the requirements given therein. Current IMDS data must be provided and its status must be accepted for all initial series sample inspections. Suppliers must ensure that the IMDS data are provided unsolicited and in a timely manner and as well considering other situations which should trigger IMDS updates: i.e. product/material change, legal requirements updates etc.- as described in IMDS General Rules and Guidelines - 3.2.1 Basic Rules concerning MDS Revisions.

Depending on the final customer and legal relevance (type approval), IMDS data are needed for prototypes, i. e. components in the development phase, or in the phases preceding the production start.

Here again, suppliers must ensure, after receipt of the Schaeffler order, that these data are provided in good time and in conformity with the applicable IMDS guidelines and customer requirements.

3. Rules:

All MDSs for parts purchased by Schaeffler must be sent to the IMDS **Org-ID 282**.

The remarks below on creation of MDSs are based on the currently valid IMDS recommendations and on the specific requirements of the automotive industry. In addition to this guideline, all applicable recommendations and customer requirements must be strictly respected and implemented.

The currently valid recommendations can be viewed, after accessing the IMDS-system, in the "Help" menu under "Recommendations". Special requirements of the automotive industry and further information on the IMDS can be found on the public pages under the menu item "FAQ".

3.1 Selection of material modules:

In principle, materials shall be reported in the MDS in their final condition. Material compounds reacting with each other or intermediate reaction products must not be reported.

As a matter of priority, the declaration requirements according to GADSL (Global Automotive Declarable Substance List: gadsl.org) must be complied with.

For standard materials, the material modules of the IMDS Steering Committee published according to IMDS Rec. 001 must be used. Exceptions are only possible if declaration requirements cannot be met by these modules. In this case, a note to this effect must be entered in the field "Remarks" in the material module.

3.2 Language:

The mandatory system language is English. Additional entries in German language are optionally possible. Entries in other languages cannot be accepted.

3.3 Specific requirements:

The main purpose of the requirements listed in this section is to ensure that the data sheets must be unambiguously correlated to a product that the requirements of Rec. 001 regarding the description of components are complied with and that Schaeffler fulfills its OEM-specific requirements.

3.3.1 Application code

Some substances require an application code (e.g. Pb, Ni). If a material module shows the tab "Application", the supplier must assign the correct application code for this substance.

3.3.2 Polymeric Parts Marking

The question on polymeric parts marking of the material (where applicable) must be answered and the answer should be in accordance with ISO 1043-1/2, ISO 11469 or ISO 18064.

3.3.3 Recyclate Information

Recyclate information must be entered for materials with classification 1, 2, 3, 4, 5, 7.1 and 7.2 which are referenced in a semi-component or component.

3.3.4 "Company data"

The following fields have to be completed:

"Part/Item No.", "Description", "Drawing No.", "Drawing date", "Supplier Code".

Completion of the other fields is optional.

Part/item number

The Schaeffler part number has 13 digits, with the last four digits separated by a "-":

Example: 054174171-0000

Component / sub-components description

The description of the component must be unambiguous and correspond to the most current Schaeffler drawing.

The use of supplier specific data, such as internal numbers, **are** not permitted.

The description must be entered in English.

If the required term is not contained in the translation table, the contact persons named above will provide assistance.

Example: Sprocket / Kettenrad

Drawing number

The Schaeffler drawing number is brand-specific. This information can be found in the "Document" field of the drawing.

Example: ***F-348096.01.KRAD; L-03131-0E96-01***

Version / Date

The relevant date is the drawing date which is the basis for series production sampling.

Example: ***5/10/2022***

Supplier no.

The number to be entered here is the specific supplier number assigned by Schaeffler. The supplier number has a 10-digit format. If necessary, the leading digits are filled with zeros. The supplier number can be found, for example, in the purchase order. Please do not use the DUNS number. Example: 0000012345

Examples of drawing title blocks are shown below. The IMDS-relevant information is highlighted:

Part/item number		Version / Date			
Material, sachen-Name 054174171-0000		Ref.-Nr.		Bezeichnung / Designation	
Tolerierung ISO 8015 (AD)-ISO 1302:2003		Tolerancing

Masse ca. / Mass approx. 272,87 g		Werkstoff, Halbzeug / Mater., semi-finished prod. siehe Beschreibung		Labor/Büro / Lab./office C68 OM/S I S-VC I-D	
Blatt Sheet 1 / 1	Format Size A0	Fertigteilzeichnung Finished-part drawing	Dokument / Document EDP	F-348096.01.KRAD	

3.4 IMDS ID:

The IMDS ID numbers are assigned according to the rules of the IMDS Rec. 001, Section 3.2.2. 001, Section 3.2.2.

An MDS with a new IMDS ID must be created for each component with a new component number. Where a correction of an existing MDS is to be created, e.g. after an MDS has been rejected or the index of the drawing number has changed, the MDS must be created as a new version of the existing IMDS ID number. MDSs whose ID numbers are not assigned in the correct way will not be accepted.

The following copying functions are available in the IMDS:

⇒ Copying: Creates a 1:1 copy of the existing record with a new ID number:

Type	Component number	ID number
F-348096.01	054174171-9001	123456 / 1
F-348096.01	054174171-0000	456789 / 1

⇒ New version: Creates a 1:1 copy of the existing record with the same ID number; only the version number increases.

Type	Component number	ID number
F-348096.01	054174171-0000	456789 / 1
F-348096.01	054174171-0000	456789 / 2

3.5 Revisions:

Revisions of MDSs can be necessary for various reasons:

a) Legally stipulated declaration requirements (e.g. REACH SVHC substances) or GADSL have to be updated. Schaeffler suppliers are expected to meet these declaration requirements promptly and without being requested, because Schaeffler must fulfill information obligations towards the customer also.

b) Rejections or other requests by Schaeffler.

Data sheets rejected by Schaeffler must be corrected directly on the basis of the reason for rejection. Schaeffler can request update due to formal changes or new IMDS rules (e.g. drawing change level)

c) Product changes

The addition of any new material(s)/substance(s) or the elimination of any already reported material(s) / substance(s) contained in a part requires the revision and resubmission of the corresponding MDS, without being requested.

3.6 Rejections:

In case of rejection of a material data sheet, a detailed reason for the rejection is provided.

4 Additional:

Basic questions on the use of the IMDS recommendations can be clarified with the IMDS-helpdesk. If you still have any questions, please contact the persons in charge. Contact information can be found below the reason for rejection, or in email received. Data revisions must be done as quickly as possible, and take into account all reasons for rejection.
